SUMMARY

Enthusiastic Python Full Stack Developer and Computer Science Engineering graduate with a strong foundation in building end-to-end web applications using Python, Django, and modern front-end technologies. Skilled in writing clean, maintainable code and translating ideas into functional solutions. Quick learner with a strong problem-solving mindset and a passion for delivering quality software.

TECHNICAL SKILLS

- **Languages**: Python , SQL, HTML5 , JavaScript , React.js , Bootstrap
- **Frameworks**: Django REST Framework , React.js
- **Tools** : Git , GitHub , Visual Studio Code (VS Code)
- **Technologies**: REST APIs, JSON
- **Databases**: MySQL , SQLite
- **Soft Skills**: Fast learner with a collaborative mindset and a strong sense of ownership in team projects.

EDUCATION

- **Musaliar College of Engineering and Technology– B.Tech in Computer Science Engineering — Nov 2021 – May 2025)**:

EXPERIENCE

- **Python Full Stack Developer Intern** — June 2025 - Present
  Luminar Techno Lab — *Kochi, Kerala*

  - **Python & Django**: Built full-stack web applications using Python and Django's MVT architecture with ORM and template-based rendering.
  - **RESTful APIs**: Developed robust REST APIs using Django REST Framework with custom Serializers and ViewSets.
  - **Front-End & UI**: Created responsive and interactive interfaces using React.js, HTML, and CSS.
  - **User Authentication**: Implemented secure user authentication and role-based authorization systems.
  - **Testing & Deployment**: Wrote unit tests for models and views; managed static/media files using AWS S3 for scalable performance.

- **Python Trainee** — Oct 2022
  RiverTech — *Ernakulam*

  - **Python Automation**: Developed Python scripts for task automation using NumPy and Pandas to improve data processing efficiency.
  - **Data Processing & Visualization**: Processed, analyzed, and visualized datasets to support internal tools and dashboard reporting.

PROJECTS

- **InternHub – Internship Management Portal**:
  - **Project Overview**: Developed a Django-based internship management platform connecting students and companies for streamlined internship discovery and application management.
  - **Student & Company Features**: Enabled students to browse, apply, save internships, track application status, rate companies, and interact via chatbot; allowed companies to post internships and manage applicants.
  - **Admin & Workflow Management**: Implemented admin controls for approving companies and internship posts, managing users, removing fake listings, and moderating reviews.
  - **Authentication & Security**: Designed secure role-based authentication using Django Auth with access control for students, companies, and admins.
  - **Technology Stack**: Django, Python, HTML, CSS, Tailwind CSS, JavaScript, MySQL/SQLite.

  - **BookShop – Django-Based E-Commerce System for Books**:
    - **Project Overview**: Designed and developed a full-featured Django-based e-commerce platform for online book sales, focusing on scalability and user experience.
    - **Core Features**: Implemented product catalog management, inventory tracking, user authentication, shopping cart, and order processing workflows.
    - **Front-End Development**: Built responsive and user-friendly interfaces using CSS, Bootstrap, JavaScript, and jQuery to enhance customer interaction.
    - **Back-End & Database**: Utilized Django ORM for database management and implemented secure server-side logic for transactions and data handling.
